Foreword to the Second Edition by Jonathan Cole, DM, FRCP  xi  
Foreword to the First Edition by Ayub K. Ommaya, M.D.  xix  
Preface to the Second Edition  xxii  
Preface to the First Edition  xxiii  
Acknowledgments  xxvii  

1 Introduction  1  
1.1 Historical Developments  3  
1.2 Criticism of Experiential Responses  7  
1.3 Synesthetes as Cognitive Fossils  10  

2 Synesthetes Speak for Themselves  13  
2.1 Synesthetes Speak for Themselves  13  
2.2 Similarity of Stories  18  
2.3 Range of Synesthetic Performance  24  
2.4 Synesthesia as an Unelaborated Percept  33  
2.5 Validity, Constancy, and Limits to Manipulation of the Parallel Sense  34  
2.6 Psychological Influence and Stigma  43  
2.7 What Is Synesthesia Good For?  46  
2.8 Familial Cases  51  

3 Theories of Synesthesia: A Review and a New Proposal  61  
3.1 Clinical Diagnosis  64  
3.2 Diagnostic Criteria for Synesthesia  67  
3.3 What and Where Is the Link?  70  
3.4 Theories of the Mechanism of Synesthesia  71
3.5 Proposal for a Synesthetic Mediator 76
3.6 Operationalizing the Theories of Synesthesia 84

4 Overlaps and Evidence for Localization 99
4.1 Phenomena Similar to Synesthesia 100
4.2 LSD-Induced Synesthesia 101
4.3 Hypermnesis 103
4.4 Release Hallucinations 111
4.5 Simple Synesthesia and Deafferentation 114
4.6 Temporal Lobe Epilepsy 122
4.7 Electrical Stimulation of the Brain 127
4.8 Summary 132
4.9 Supporting Evidence for Anatomical Localization 133
4.10 rCBF Redistribution in Synesthesia: Analogy to Migraine Theory 158
4.11 Relation of Synesthetic Perceptions to Klüver’s Form Constants 161
4.12 Conclusion 168

5 Spatial Extension 169
5.1 Legacy of Gestalt Psychology 171
5.2 Auditory Scene Analysis 173
5.3 Form Constants Revisited 177
5.4 Number Forms 179
5.5 Sensation of Movement 187
5.6 Synesthetic Configurations 188
5.7 Memory Maps 197
5.8 Conclusion 205

6 The Neural Substrate of Synesthesia 207
6.1 Concepts of Neural Tissue 208
6.2 Anatomical Details 216
6.3 Lateralization and Hemispheric Specialization 242
6.4 The Limbic System 248
6.5 Color and Spatial Analysis 254
6.6 A Transmodal Binding Model of Synesthesia 263
